Mr. Tim Gehring Director of Facilities Management Worthington City School District 250 East Wilson Bridge Road Worthington, Ohio 43085

Re: Lead in Water Testing at McCord Middle School

1500 Hard Rd, Columbus, OH 43235

Sample Date: June 27, 2016 L&A Project No: 16-0311

Dear Mr. Gehring,

Lawhon & Associates, Inc. (L&A) performed water sampling to document concentrations of lead in the potable water system. There is no federal law requiring testing of drinking water in schools, except for schools that have their own water supply and are thus regulated under the Safe Drinking Water Act (SDWA). This testing was performed as a proactive measure to ensure lead in drinking water concentrations remain at acceptable levels. L&A's conclusions and recommendations relevant to the sampling performed are presented in this document.

METHODOLOGY

L&A performed environmental sampling for lead in water at McCord Middle School on June 27, 2016. The sampling was conducted in accordance with the United States Environmental Protection Agency's (US EPA) guidance document "3Ts (Training, Testing, and Telling) for Reducing Lead in Drinking Water in Schools" (3Ts Guidance); however, a larger sample volume was collected due to laboratory requirements for Ohio EPA certified methods. A sampling plan was developed for the facility, which prioritized drinking water sources based on potential use and risk. Field activities included the collection of one (1) liter first draw water samples from the water main (or first outlet off the water main), drinking fountains, kitchen sinks, and approximately 10% of classroom sinks or other potential drinking water sources. Flushed samples were collected and submitted for analysis only if the first draw sample from the same fixture exceeded the US EPA Action Level. Prior to sample collection, the potable water system was not used for a minimum of 8 hours. Samples were collected by Mr. Shawen Jenkins, Ohio Department of Health (ODH) certified Lead Risk Assessor (LRA) #LA9297. Samples were submitted to MASI Environmental Laboratories located in Plain City, Ohio for analysis using the EPA method SM3113B. MASI is certified by the Ohio EPA for lead in drinking water analysis.

REGULATORY ACTION LEVELS

US EPA's 3T's Guidance recommends an action level of 20 parts per billion (ppb) for lead; however, Ohio Facilities Construction Commission (OFCC) Lead Plumbing Fixture Replacement Assistance Grants Program has set an action level of 15 ppb for lead which is consistent with

1441 King Avenue | Columbus, Ohio 43212 | P:614.481.8600 | F:614.481.8610 | www.lawhon-assoc.com

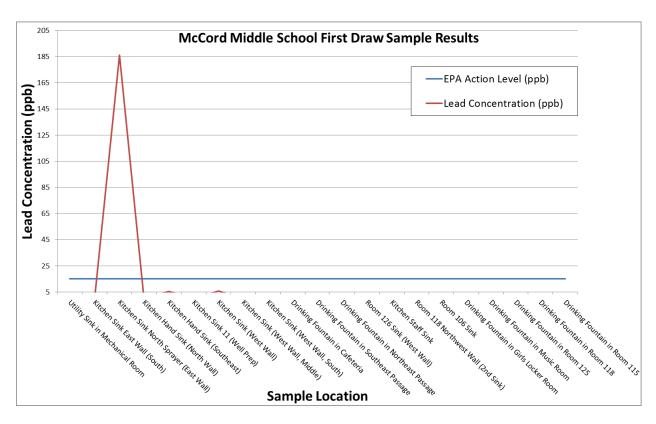

the action level for lead set by EPA's Lead and Copper Rule, under the National Primary Drinking Water Regulations (NPDWR).

For the purposes of this assessment, L&A has utilized an action level of 15 ppb lead for comparison with the laboratory analytical results.

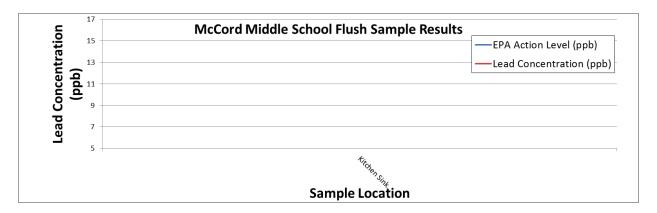

FINDINGS

L&A collected twenty-one (21) first draw water samples at McCord Middle School. A diagram of the sampling locations is presented in Appendix A. As illustrated on the following graph, lead was detected above the action level in one sample location:

Kitchen Sink North Sprayer (East Wall) (186 μg/L)

L&A collected and submitted a flush sample for this location. As illustrated on the following graph, the lead concentrations in the flush sample collected were reported below the action level and the detection limit.

A comprehensive data table is included as Appendix B. A copy of the laboratory report is included in Appendix C.

CONCLUSIONS

The results of L&A's sampling indicate that the following location had lead concentrations found in excess of the action level in the first draw sample but below the action level in the subsequent flush sample, indicating that the source of lead is likely in the fixture itself or the plumbing connecting the fixture to the lateral, and very little lead is likely coming from the plumbing upstream of the fixture:

Kitchen Sink North Sprayer (East Wall)

Based on the results, L&A recommends cleaning out the aerator screen of the Kitchen Sink North Sprayer (East Wall), replacing any lead containing components, or replacing the entire fixture and retesting to confirm that the lead in water concentration no longer exceeds the action level.

CLOSURE

L&A has prepared this report for your use in accordance with generally accepted inspection and testing practices. The information obtained in this report is site and time specific and pertains to this project only. This inspection evaluated the conditions that were readily accessible at the time of the investigation of the subject property and does not warrant against hidden conditions or future alteration of conditions at the site, as well as subsequent changes in regulations. This report should not be construed as a full Lead Risk Assessment.

This report was prepared for the exclusive use of the Worthington City School District. No other party may rely on this report unless expressly designated by the Client in writing. The use of the report is subject to the limitations and exceptions set forth in this report, as well as the terms and conditions contained in the original contract documents. L&A will not distribute or publish this report without the Client's consent, except as required by law or court order.

Thank you for the opportunity to assist you in this important matter. If you have any questions concerning this report, please contact Shawen Jenkins or Tim Price at (614) 481-8600.

Sincerely,

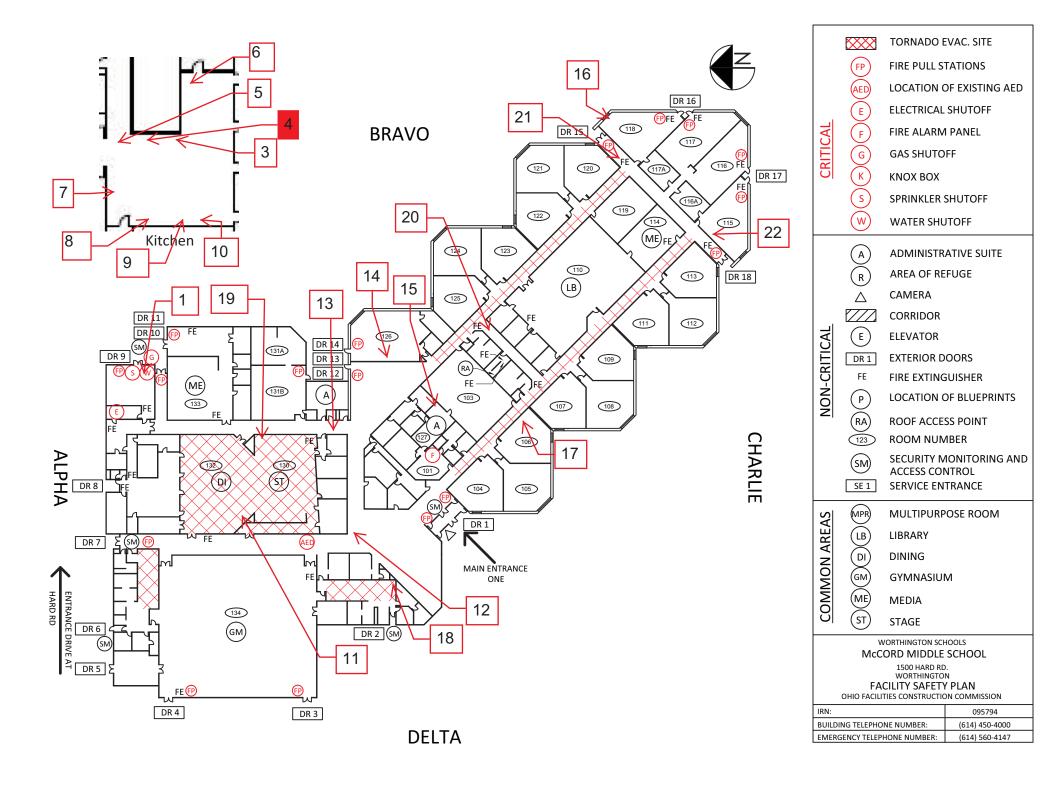

Shawen Jenkins, Lead Risk Assessor

Environmental Scientist

Tim Price Senior Project Manager
